APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the place of use of a portion of the waters of an underground source as heretofore granted under Permit 24583, Certificate 7834, is issued subject to the terms and conditions imposed in said Permit 24583, Certificate 7834, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 67049-T and 24583, Certificate 7834, and any waters of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 4.0 acre-feet per year for the irrigation of 152 acres. The permittee is responsible for insuring delivery of the entitled decreed and storage waters that are supplemental to Permits 67049-T and 24583, Certificate 7834. In any year that the Walker River Irrigation District declares a full allocation of decreed waters to the priority years of C-125 claims supplemental to these Permits, underground water shall not be pumped from the wells described in these permits. In any year that the Walker River Irrigation District has no decreed or storage water, or declares a reduced allocation of surface water to the priority years of C-125 claims supplemental to these Permits, then the place of use of the permits can be irrigated with underground water, but not to exceed a duty of 4 acre-feet per acre per year from the total of decreed, storage, and underground waters.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **February 14, 2002** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.71 cubic feet per second, but not to exceed 160 acre-feet annually, and not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Water must be placed to beneficial use on or before:

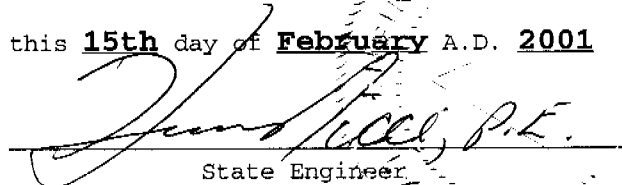

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set
my hand and the seal of my office,

this 15th day of February A.D. 2001

State Engineer
